

Why our culture fails to accept that combining logic with truth is the base for all understanding – or *that truth is the reality of the order in which we exist*. Why every media incessantly promotes our animal instincts while undermining human development.

All the above are parts of an integrated design to move children from the influence of parents and increase mindless behavior. It is a device for moral/social destruction.

When such elements of cultural change are combined – there is deliberate corruption being exposed.

We need think more seriously to understand why it is that most of us are now willing to accept, without concern, the most deadly deceptions ever to challenge the intellect and moral resources of humanity. Why the most elementary steps are not taken to make law = justice and why childishly inefficient and unconstitutional government is praised (and presented as if by public acclaim) as the world's best.

Writers of our national constitutions would not have been blind to this deceit nor would they have accepted it: why are we now submissive?

I have so often referred to these questions in the past, let us skip from these life/death questions and, for a minute, direct our attention to the bigger, more urgent, question.

Why are we, with overwhelming numerical advantage and with access to all the evidence we need, still losing this battle for our health, our wealth, our wisdom and our humanity?

This is certainly related to the preceding questions and is in spite of the old wisdom that tells us:

United we stand, divided we fall.

Ideological divisions, religious divisions, political divisions or cultural divisions; they make us weak and we grow weaker. But it is by a myriad of little changes that we are led, gradually, to disaster.

Those who see that something is wrong are ever eager to promote new 'evidence'. So, eager to believe its appearance of being on our side they do not think about where it may have come from and fail to check its logic or reliability. It has been made so hard to see the big picture – to see that there is a world-wide program to take-over earth and that we need to be suspicious of 'gift horses'. By distribution of 'incredible' revelations the whole resistance movement was discredited.

Why don't we want to see that ownership of earth is an historic ambition – that the only valid excuse for global-elite world ownership today is to eliminate the huge population now so mindlessly wasting our natural resources? But the Globalist answer is an animal answer, it is not a human answer.

Why do we ignore the clear evidence that there is a crime syndicate in control of infinite stolen wealth – that corrupt power now rules earth?

If we DO look with honest intent then we CAN understand that this power wants us morally blind, money poor and socially ignorant, and has the financial strength to gradually increase our deception, multiply our divisions, >>

strengthen our distractions and plan our disposal.

Looking honestly we can easily understand that these global forces have agents working constantly to spread false ideas, encourage our pride, and flatter our determination to succeed wherever OUR success can be invoked to weaken our own credibility.

We can then understand why every abuse of power entered into by Globalism is secretly promoted as "about money". Almost everyone has greed for money so that does not frighten us, it is a great decoy. Or they promote the belief that what they do is about gaining 'cheap oil', saving 'freedom' or spreading (our fake) 'democracy'.

If we do not believe political atrocities to be 'mother love' activities for our good, then we may start to wonder what they are really about. We may say to ourselves, hey, why do they want money when they control international finance, international commerce and can print or manipulate any gain they want? We may say: "Hey, the price of oil has doubled, not halved!" Or: "We could never, in a lifetime, pay for the war and, from oil profits, repair the damage; the experts say that in 25 years oil will be in short supply."

Globalism needs control – not money! They have to keep the people poor, distracted, ignorant and helpless. That is exactly what we can see in Globalist planning. We should never forget that for achievement of true democracy and the advancement of our humanity our greatest need is LOVE of

>>

truth (so they tell us there is no truth). When we have enough faith in truth to sacrifice our pride then truth will advance to tear down our divisions and unify our commitment to the human welfare.

Failing that, all our efforts are not only useless for achievement of our goals but mostly destructive of our cause.

Jesus of Nazareth told us that a little faith could move mountains but the scribe who recorded this fragment of memory did not record WHAT Jesus said we need have faith in. However a little logic added to human understanding reveals that what we need have faith in, is TRUTH. A little faith in truth does more than move mountains: it also defeats injustice and all those who promote injustice.

For support of the above read MindWeb articles and books, key words in the "Site Search" facility may help you find related items. Additionally this series of "Discussion leaflets" will concentrate on critical social issues.

Leaflets in format can be down-loaded ready for 2 side printout on A4 paper. Enter at "Leaflets".

One advantage of printed material is that it can be kept handy for reference – or to pass to others for comment or discussion. A more important advantage will become visible as you read the 6 leaflets already on site.

Discussion Leaflet **3**.

The Battle for our Right to Life

Fighting for human rights and freedoms before I knew there was a battle to be fought or a world to save, and expressing green problems before green became a political distraction! I am still sorry it has taken so long to find the evidence to help those serious about understanding cultural manipulation.

Still, had I sought help from 'authorities' or not started from scratch, I would never have reached this point. Make no mistake, life may be a never-ending story but we do have the ability to learn enough for our times.

**For so long I have watched this battle for humanity being lost.
It has taken just so much time to uncover the intrigue that explains why.**

So let us consider why we have been losing this battle. Why has the thieving of human rights and freedoms (under a philosophy of gradual gain and cleverly disguised politics) been so well hidden for almost a century that it now, almost unopposed, gains pace as years pass?

First we have to face that this battle is global – and to death.

We need think seriously about:
a/ why we need be so often reminded (every news session and more) that, in European cultures, we have democracy;

>>

b/ why there are so many religions claiming the eternal God and so many denominations claiming to be their true expression.

We, in European cultures, need to admit the plain evidence that we do NOT, in fact, live in democracies and ask why we are content to ignore our legal rights while, like hypnotized bunnies, we defend the system that is culturally raping us.

We also need to understand that no capable, honest scientist can find any scientific evidence for a better idea of origins than is the concept of a creator God! The infinite can not be explained! We need also ask why the evolution religion is perpetually proclaimed as scientific while having a status below scientific theory. Or why no science can offer any theory for the creation of life that, intelligently, can dispute that the creation of life is an intelligence-designed program.

We need to think seriously about why, with such great advance in technology, there is now decay rather than advance of social intellect. This includes wonder of why each increase in worldly goods seems accompanied by increase in greed and avarice.

We need ask ourselves why compulsory education adopts less efficient ways of teaching basics and finds more effective ways of teaching junk. Why peer-group formation was encouraged though it divorced us from the love, experience and wisdom of parents – with consequent increase of mindless, arrogant, social behavior! Why mothers must work to send their children to kindergartens to gain biased learning.
