

decision-making) achieved by improved understanding. These are all elements involving our ability to either gain individual initiative or suffer its removal by deceit.

Our enemies seduce us to incompetence so as to force us to trust in leaders for guidance and life support. They do this gradually so parents can easily excuse childishness they observe in teenagers as just being in the nature of adolescence.

So how can we test that we are manipulated by misleading information in order to force our acceptance of false caring and immoral life values? We can test ourselves by logically weighing obvious evidence to see and admit what SHOULD be obvious to us.

Try this example: Was it easy to pick holes in the parenting style of others while feeling confident of your own efforts? Then, if loving family security and unity did not reward your efforts did you ever admit to yourself that you may have got it wrong – that you may have trusted media rather than nature?

Did you ever accept that in the times of your grandparents the common family was a united family with comfortable drug free life and values? There was then no “peer-group” revolution leading to cultural degeneracy! Did you ever doubt the commonly promoted view of family needs? Did you ever seriously challenge newly promoted attitudes?

Honest answers to those questions should give many readers hope that they can salvage their moral integrity. Once willing to face that acceptance of modern conventions is no substitute for personal responsibility we >>

are free to dig deeper and help salvage the future of the entire human family.

Individuals may not be at fault for adopting the false promotion but it is the individuals fault if, knowing of ability to admit error, there is still no willingness to sacrifice the selfish error for enlightenment; no will to make use of the given ability for redemption.

So, having come so far, how can you now better confirm that you have been acting as a consequence of being a victim of control by deceit – of accepting peer-group values as true values rather than accepting responsibility for your actions by seriously putting your reasoning ability to use?

Do you now see that by accepting mass media promoted opinion rather than thinking things through or researching to find logical answers for yourself, you make yourself available to enslavement by alien authorities.

For Example

Everyone knows we (of European culture) live in democracies. Have you ever thought about what “democracy” or democratic “republic”, means? Put simply it means government that represents the people; e.g., *Government of the people, by the people and for the people.*

It also means freedom! Have you thought that freedom means having the ability to find and develop your true self rather than be just an animal living in slavery to a nature over which you have no control?

Do people of any nation in the world today have the democratic freedom of personal self-development by virtue of achieving self-government; the answer can only be NO >>

because there is no nation where any electorate organizes itself to choose its own representative.

It is not as if installing democracy requires any great effort. It does not require the dedication (implied) in the raising of family that is now so vital to the future of the family.

All that is required is that each electorate set up a simple form of “electoral commission” to organize the selection of one or more people of suitable ability, integrity and willingness to serve as representative of their electorate. In the world of today our need to achieve freedom is both straightforward and easy to understand.

But today, in all so-called democracies, the electorate only chooses between parties interspersed with so-called independents.

The electorate these pretend to represent has no first choice of them! None of these ever ask the electorate what it wants done and all offer to do what they think will get them the most votes irrespective of their inability to fulfill any promise.

Those honest can no longer believe their government is either democratic or republic; or honestly fail to see their enslavement by lies. In whatever ‘western’ nation you live your government is by people chosen by other than the community governed and feels no obligation to represent other than those with the first power of choice over them.

Only when willing to admit this truth can we escape our enslavement.

In Service:

TheMindWeb has exposed that ‘Party System’ government has, for thousands . >>>

of years, been known as a system of government that can never become democratic and will always become corrupt.

So those who have believed that this system is the democracy our constitution offers; or accepted it because of feelings of trust in a government that visibly acts outside national law – have been mind manipulated.

Those who do not think our constitutional rights and safeguards worth defending are deceived to the point that they have no true idea of what they were losing.

Yes we have been mind manipulated because in no common sense would we support a disguised dictatorship that is beyond community control and all powers agreed to by our constitution – powers that, in more enlightened (less deceived) times, we fought and died for. Even less would you bow to unknown forces that you could so beneficially and so easily, avoid.

So, if you are as honest as I expect, you now accept you are only so submissive because of mind-manipulation.

I leave you to look for other examples of deformed thinking, if you need them, but I press on because those who don't want to think for themselves will not be swayed by any amount of evidence.

Slavery by Deception

(Part 1)

How can we know – do we dare look?

Mind manipulation is something those afflicted cannot see in relation to themselves; if they could this enslavement would not be possible. Mind manipulation (control by deceit) is the most common form of slavery. Mentioned by Jesus two thousand years ago but then, even He was not believed.

John 8:31-35 *“If you dwell within the revelation I have brought, you are indeed my disciples; you shall know the truth and the truth will set you free. “They replied, we are Abraham’s descendents; we have never been in slavery to any man. What do you mean by saying, “You will become free men”?’ “In very truth I tell you, said Jesus, that everyone who commits sin is a slave”.*

Sin is a social crime and no true human would commit it were it understood as being the equal of cutting off your nose to spite your face. But this enslavement is true of about 99.9% of all ever to have lived so, if Jesus was not believed then how can I expect to be believed now?

We live in different times; His listeners were (in so far as we know education today) uneducated. Even today our best education does not enlighten us to the potentials and dangers of enslavement by deceit. Why: because our culture today is arranged so as to maintain that enslavement. In fact, we

today are even more dominated by immoral values and quisling leaders.

We are also more advanced now in that we not only have access to enlightenment but have developed greater understanding and services that allow us access to information if we choose to use our intellectual gift. We also have language very far from the primitive language of uneducated people 2000 years ago and now, by admitting the logic of it, we can prove our situation to ourselves.

We now have access to information not imagined in those times. So, while now more efficiently deceived we also, if we have the courage for free living, have ability to escape our enslavement.

Our readers can now know about the effectiveness of Hegelian Dialectic for induced self-indoctrination and also of the efficiency of peer-group socializing programs aimed at family destruction and the isolation of each new generation from the accumulating cultural wisdom.

Add to this the efficiency of T.V., and mass-media in general, to impress degenerate social values as being enlightened values; including the brutal seduction of morality by pop-music.

At the same time, see how the natural development of intellectual logic is undermined so as to increase our gullibility and enhance our reliance on leaders! Finally add the efficiency of advertising to mislead and undermine confidence in public decision-making.

All the above are reported on and show clearly why we have lost moral sense and also vision (vision is an attribute of logical
